

Stop the Invasion

Oregon's Aquatic Invasive Species Prevention Program

CRB Meeting December 8, 2016

Rick Boatner
Invasive Species Wildlife Integrity Coordinator
Rick.j.boatner@state.or.us

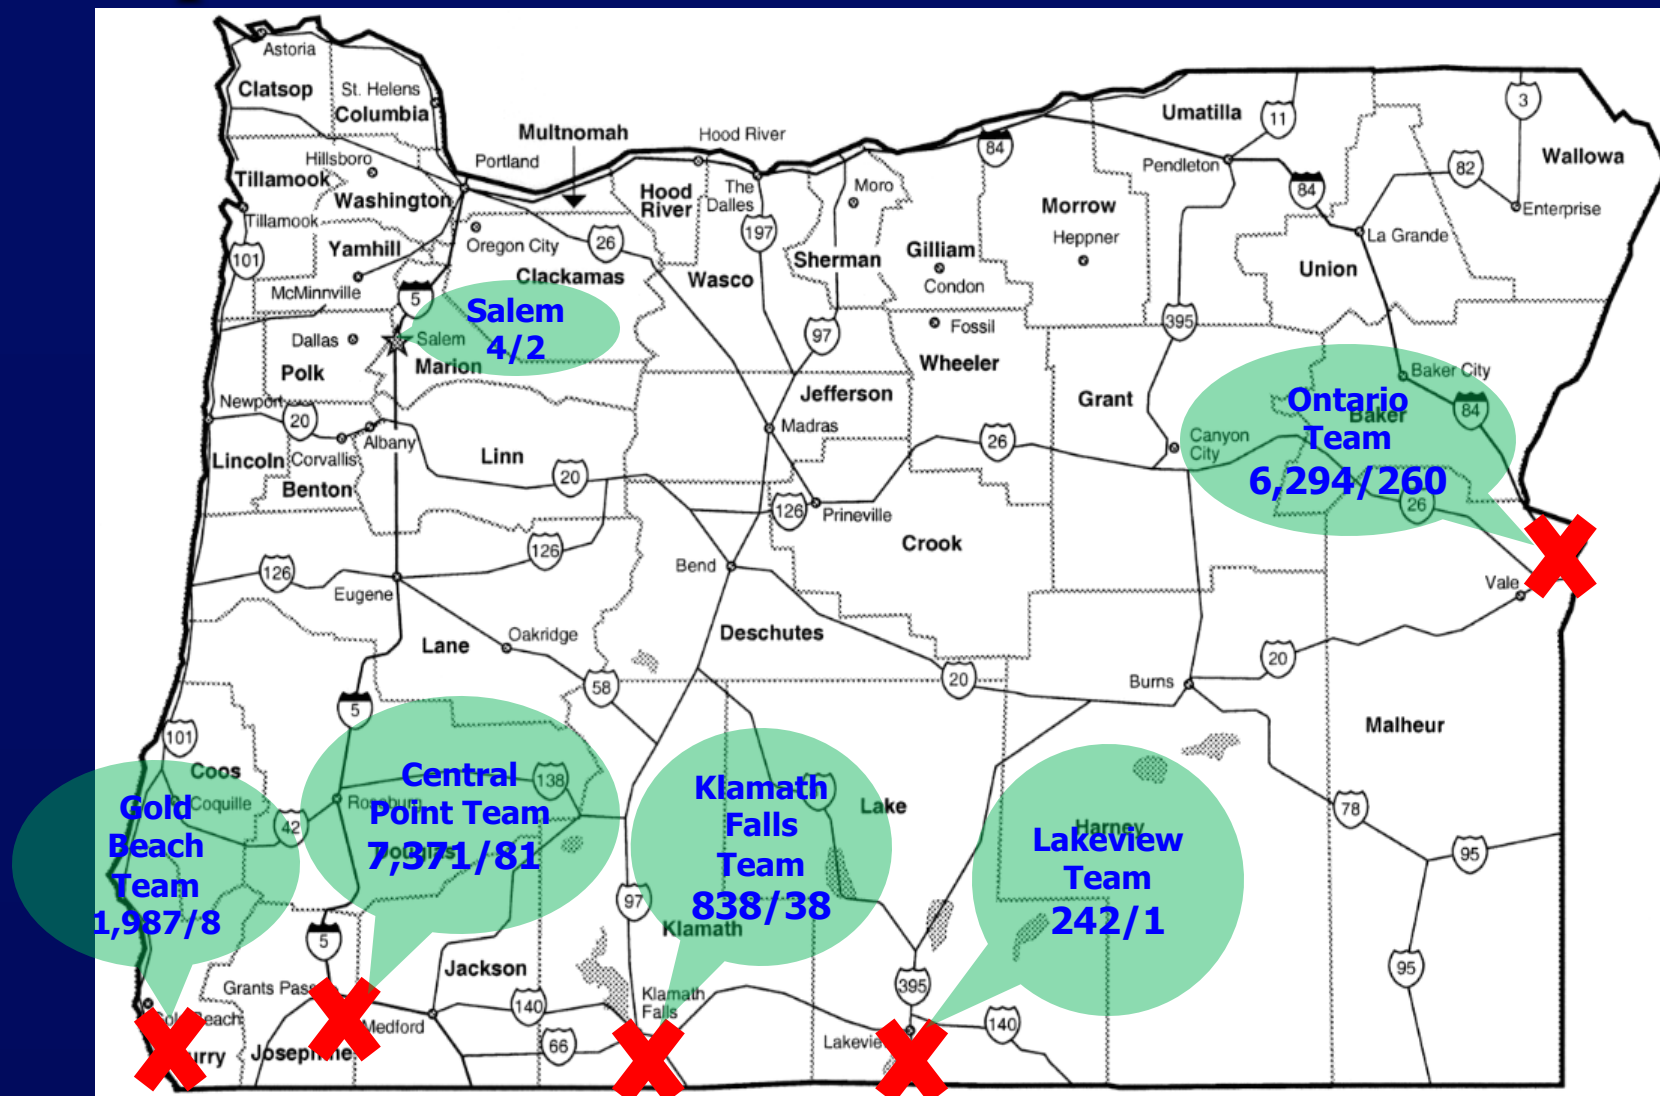

Outline

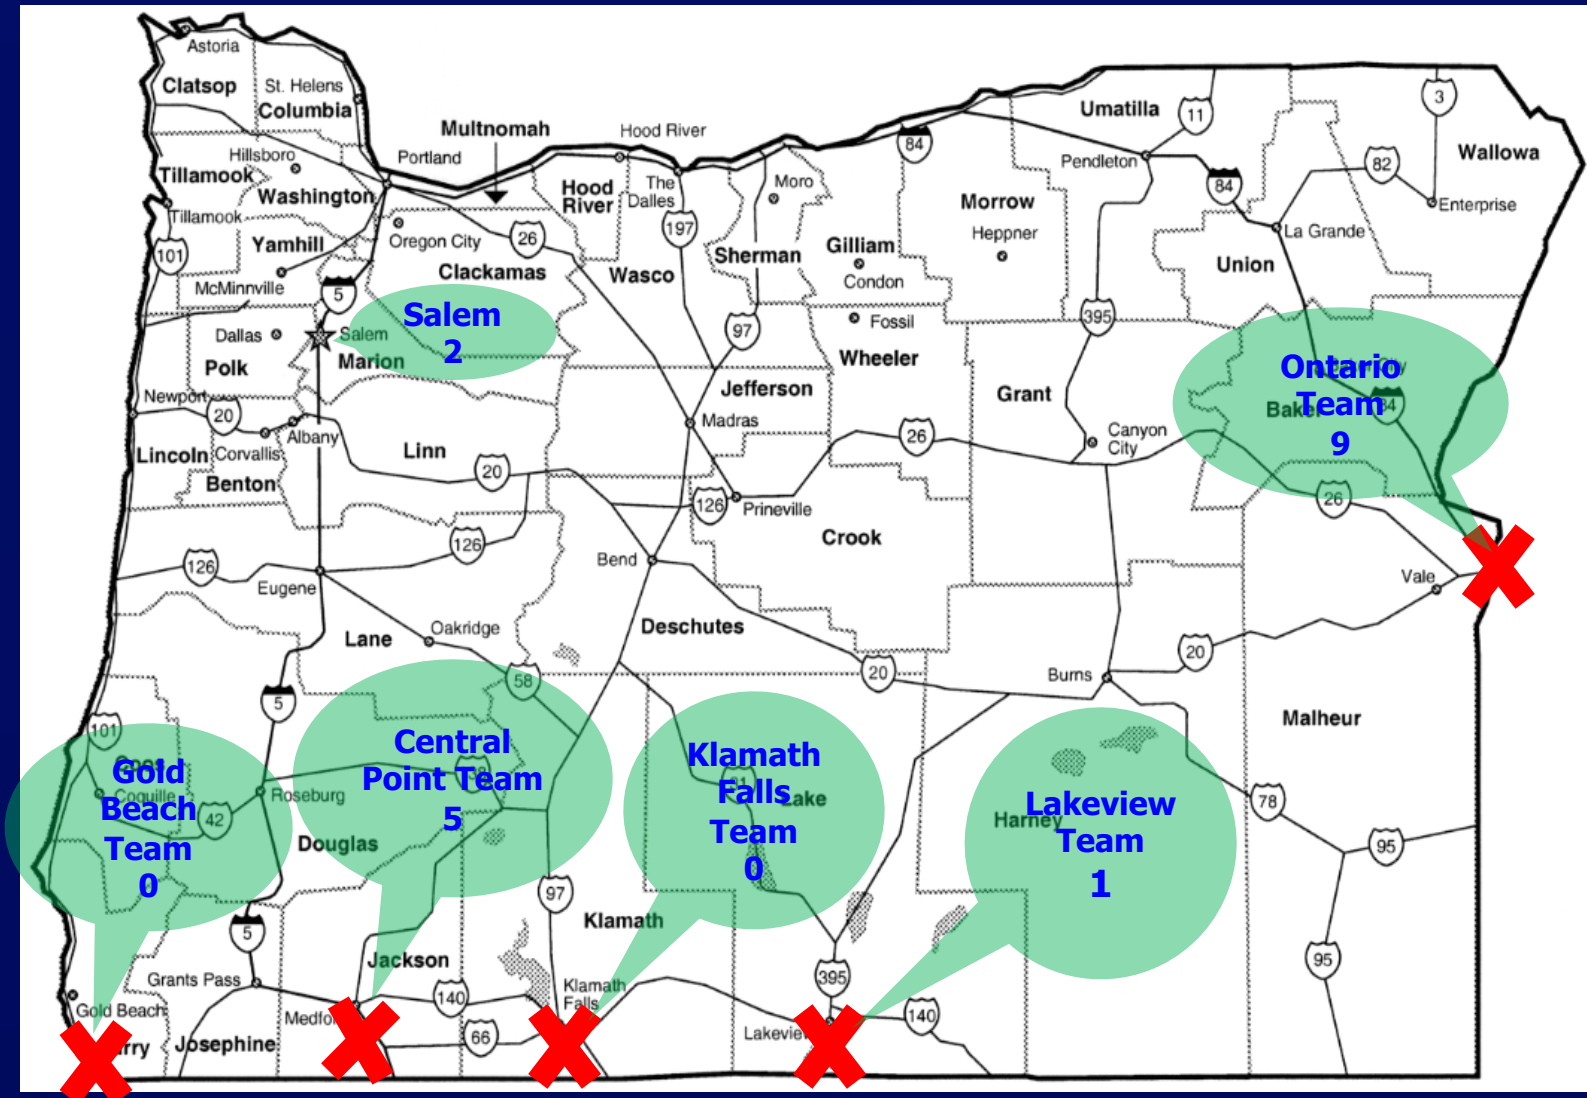

- 2016 Inspection Summary
- 2017 Inspection stations and proposed stations
- Redundancy – a good thing
- Northern Pike

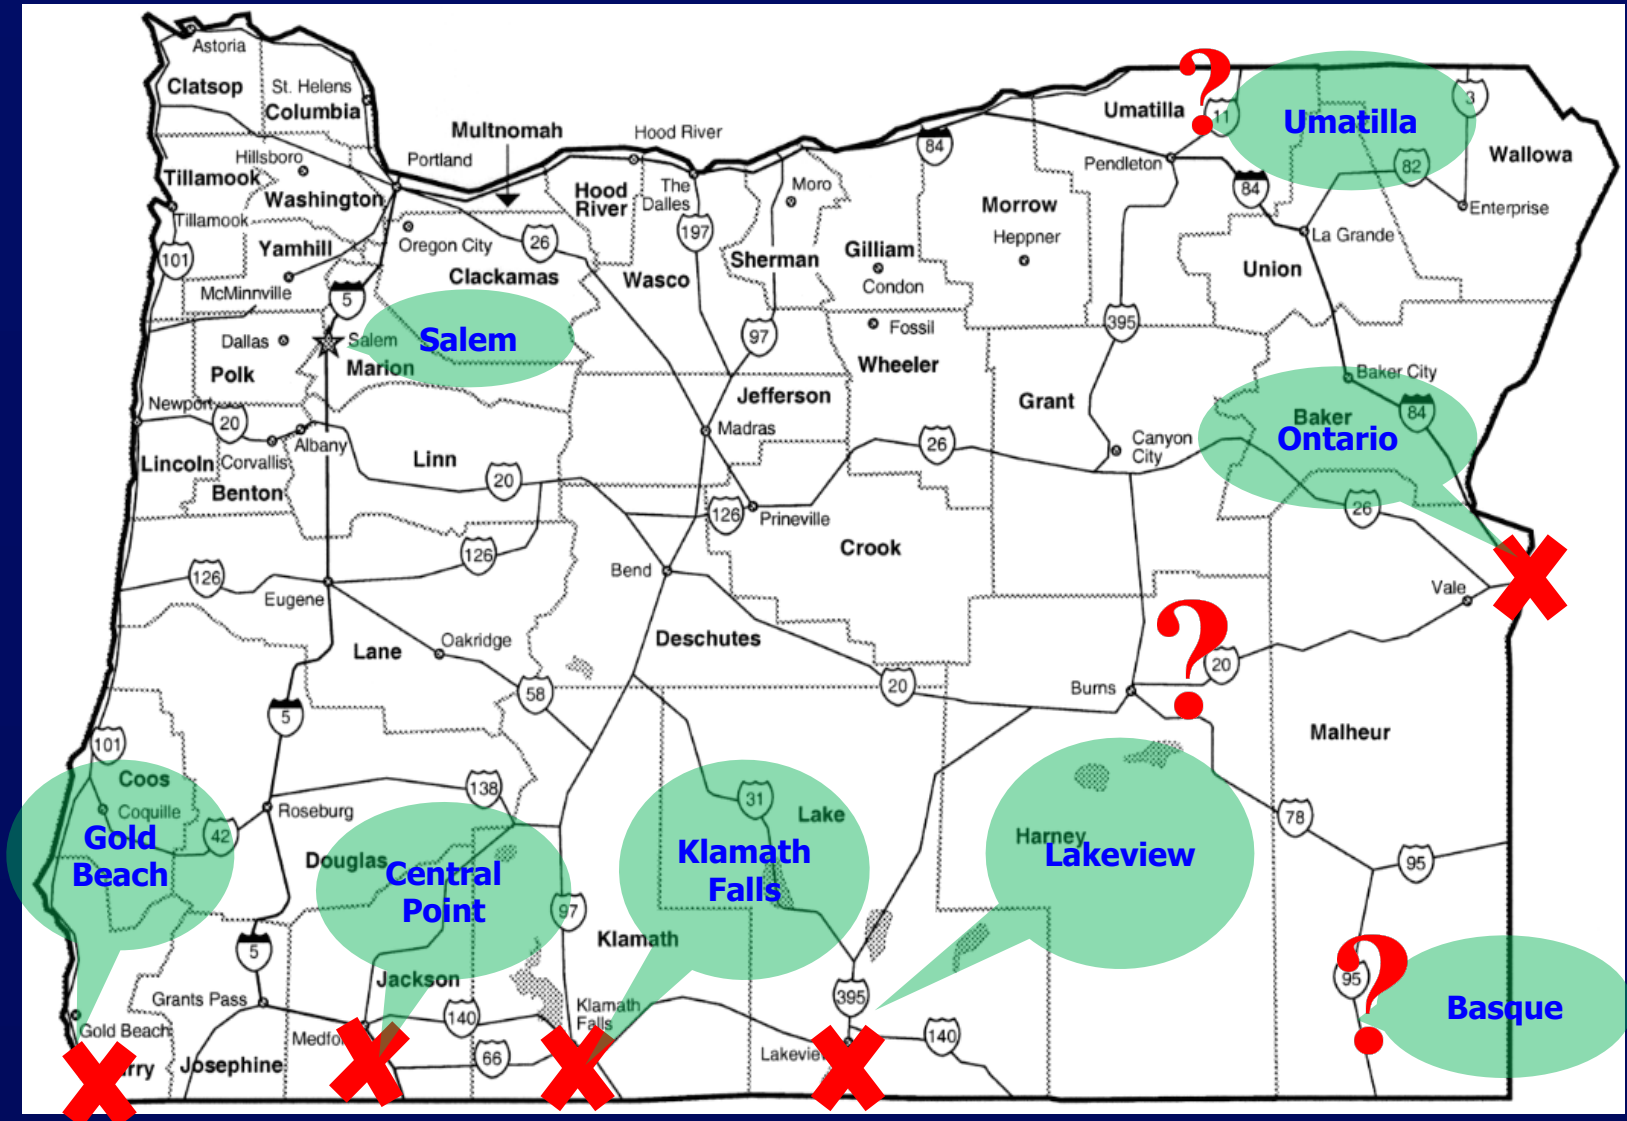

2016 Summary of Watercraft Inspections and All Decontaminations

2016 Quagga/Zebra Mussels Intercepted

2017 Watercraft Inspection Stations

~~Reciprocity~~

- Different state rules
- Mussels are small and easy to miss
- Human factor
- Equipment failure

STOP THE SPREAD OF INVASIVE NORTHERN PIKE

Northern Pike (*Esox lucius*)

are a Prohibited Species in Oregon. Anglers are encouraged to kill all Northern Pike encountered, do not release them back into the water.

Harvested Northern Pike must be dead before anglers leave the water where they are caught.

NO MINIMUM SIZE OR POSSESSION LIMIT

Northern Pike are currently not present anywhere in Oregon and with your help we can keep it that way. This

fish species is known to have negative impacts on native fish populations and popular sport fisheries. In addition, further spread of Northern Pike from their present location in the upper Columbia River Basin

into downstream portions of the Columbia River pose a severe threat to Salmon and Steelhead recovery efforts.

It is illegal to transport and release live fish into Oregon waters without an ODFW permit.

If you see someone transporting or releasing live fish, please call Oregon State Police at: 1-800-452-7888
